Gulu.

Dear Sir,

I Am applying for a scholarship being offered by St.Mary`s hospital,lacor to go do masters in pediatrics and child health. I am a medical officer currently working in pediatrics ward in St, mary`s hospital.

I believe my chosen profession will enable me fulfill my passion for working with the children and expand my knowledge base and skills. In my senior six vacation I was volunteering to teach the Sunday school children and still do if the Sunday school need help.

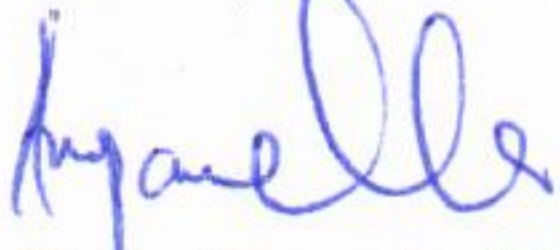

I am also interested in humanitarian work and Lacor hospital being a hospital with a mission to serve the poor and promote access to health care to women and children and a core value to respect human dignity makes me want to be part of the organization.

Education has always been an important aspect of my life, always wishing to make the most of my education. And because of this and my interest in pediatrics ,after finishing clinical school , I put myself through medical school and became a medical officer. And now if granted the scholarships will be able to pursue a masters program in pediatrics and child health.

I am a committed, self-motivated ,reliable persons who work under minimal supervision and good team player, with the heart to serve and aiming at giving the the people I serve quality care.

My goal is to become a pediatrician and committed to come back and practice in the lacor hospital ,giving back to the community I serve. And also in the future would love to become a pulmonologist or pediatric hematologist.

Thank you

Dr Aol Pamela Mwa
